# Counsel,

Although not required by the Special Master's order, we are reproducing the schema we provided on June 16 to include data type. We are also providing this data for tables discussed at the June 2, 2022 deposition of Mike Duffey containing user identifiers.

We provide this data pursuant to the protective order and under Paragraph 32 of the Special Master's Amended Order Regarding Production of Named Plaintiff Data.

Best, Martie

### Counsel,

Attached are schema (column names) for a list of Hive tables for which Facebook is proposing to search and produce data from a statistically significant sample.

This list was generated using the same classification system used to generate the list provided in Facebook's April 11, 2022 submission, which, as explained in its June 2, 2022 submission, performs data classification in Facebook's data warehouse. Lists generated from these classifications may differ due to the time period for which they are run. The

# Case 3:18-md-02843-VC Document 1085-21 Filed 12/12/22 Page 3 of 31

April 11, 2022 list was generated for a single day, and the attached list was generated using a 30-day lookback, which we believe is more comprehensive. Lists may also differ because of the dynamic nature of the warehouse, in which tables, or data within tables, are being created, changed, or removed. As a result, the attached list is not exactly the same as the list generated for the April 11, 2022 submission.

Best, Martie
